About This Game

The year is 2027. The world as we know it is unraveling after fifteen years of economic meltdown and widespread global conflict over dwindling natural resources.

A once proud America has fallen, her infrastructure shattered and military in disarray. Crippled by a devastating EMP strike, the USA is powerless to resist the ever expanding occupation of a savage, nuclear armed Greater Korean Republic.

Abandoned by her former allies, the United States is a bleak landscape of walled towns and abandoned suburbs. This is a police state where high school stadiums have become detention centers, and shopping malls shelter armored attack vehicles. A once-free people are now prisoners… or collaborators… or revolutionaries.

Join the Resistance, stand united and fight for freedom against an overwhelming military force in Homefront's gripping single player campaign penned by John Milius (Apocalypse Now, Red Dawn). Stand alongside a cast of memorable characters as an emotional plot unfolds in this terrifyingly plausible near-future world. Experience visceral, cinematic first-person shooter action as you fight your way across Occupied USA using guerrilla tactics, and commandeer military vehicles and advanced drone technology to defeat the enemy.

Multiplayer brings epic warfare to the online arena as infantry, tanks, attack helicopters and combat drones battle across huge, open battlefields. A rich feature set offering layers of tactical depth combined with a game-changing innovation in the multiplayer space will set a new benchmark in online warfare.

- **Discover a terrifyingly plausible near-future world** – the familiar has become alien in this nightmare vision of Occupied USA

- **Fight for a cause** – join a cast of memorable characters as your resistance cell wages a guerrilla war against

overwhelming military odds in the name of Freedom

- **Witness the human cost of war** – a gripping story from the pen of John Milius is told through immersive, interactive 1st person cut scenes

- **Experience explosive FPS gameplay** – battle through a dynamic mix of infantry and vehicle combat in a gripping single player campaign boasting intense, memorable set pieces

- **Take the battle online** – experience large scale multiplayer action like never before in epic infantry and vehicle warfare

Title: Homefront
Genre: Action
Developer:
Kaos Studios, Digital Extremes
Publisher:
Deep Silver
Franchise:
Homefront
Release Date: 14 Mar, 2011

 a09c17d780

Minimum

OS: Windows XP, Windows Vista or Windows 7

Processor: Intel Pentium Core 2 Duo 2.4 GHz or AMD Athlon X2 2.8GHz

Memory: 2 GB RAM

Graphics: Shader Model 3.0 graphics card with 256MB of memory, NVIDIA GeForce 7900GS or ATI Radeon 1900XT

DirectX®:

Hard Drive: 10GB of free hard drive space

Sound:

English,French,German,Italian,Dutch

... multyplayer is still great fun!. I could only recommend this to a person, or group of people, as an example of how NOT to make an FPS game.

The first glaring problem was the collectibles. They're scattered randomly and indiscriminately leaving the player to either concede to not collecting them all or search every area, including firefights, for them.

The weapons selection is few and incredibly varied. I found one rifle (the M4) that I didn't mind using and an "M110" that was passable as a secondary. All of the others are clunky and painful to use.

The game is extremely difficult in all the wrong ways. The "iron man" achievements for completing missions without restarts or deaths are nearly impossible due to random RPGs, several limitless spawn sequences, and several instances that are purely luck. Ammo stocks would be adequate if I didn't have to fight my guns so much. Sub-par hit detection combined with emaciated-child levels of recoil made me run out of ammo every dozen kills or so.

There are several instances where the player needs to wait for an NPC to move a fridge - always a fridge - out of the way of the path. Then each of the 1 to 4 NPCs will slowly walk through until the player can finally trail in behind them.

There are a handful of stealth-style segments where the player "sneaks" around less than 10 feet behind armed enemies in broad daylight without tall grass, camouflage, or any hint of cover that would prevent another human from detecting you. The player is expected to fire sniper rifles undetected within close proximity to enemies. It's equipped with a silencer, sure, but anyone who ever held a gun knows that it doesn't mute the shot entirely.

They relied on mediocre storytelling and (for the time) decent graphics to sell an otherwise underwhelming game. I picked my copy up for $5 on sale and I suppose the humor my wife and I got out of making fun of the hollow characters and highschool-level writing was worth that much.

Also, I heard Periphery has a track somewhere in the game but I haven't found it yet. If it's in the end credits, I'm not sure I'll ever hear it.
